

Getting diversified with ETF

“Highly efficient investment instrument with full benefit of diversification into different underlying instruments. ETF is listed on exchanges, real time pricing and execution can be enjoyed with ETF”

What's ETF?

One of the most efficient products, the structure is a combination of Equities and Mutual Fund.

Why ETF?

- ✓ Easily traded on exchanges, similar to equities
- ✓ Diversified by investing in various equities underneath one ETF, similar to mutual fund
- ✓ Relatively low “Expense Ratio”
- ✓ Small minimum investment amount
- ✓ Real time execution and pricing
- ✓ Varieties among Passive and Active ETFs

Types of ETF

- ✓ Invest accordingly to each ETF investment policy through different asset classes such as Money Market, Fixed Income, Equities Indices, Commodity, Alternative Investments and Currencies.
- ✓ One of the most actively traded US indices ETF namely **SPY which tracks S&P 500 index and QQQ which tracks Nasdaq index**. Thematic ETF has gained popularity with high growth investment theme such as Electric Vehicles, Cloud Computing, Innovation, Etc.
